Antioxidant Skin Care

A new line of antioxidant products is available to help prevent skin damage. Products in the Replere skin care line, developed by dermatologist Dr. Debbie Palmer, include a blend of anti-aging ingredients to neutralize free radicals and protect the skin. A key ingredient, coffee arabica extract, contains high levels of phenolic antioxidants. The efficacy

of the antioxidants in the Replere products has been rated as high using the Oxygen Radical Absorbance Capacity scales for skin care (ORAC-sc). The product line includes Deep Clean & Clarify Face Wash, Pore Minimize & Mattify Skin Tonic, Protect & Rejuvenate Day Lotion, Repair & Replenish Night Crème, and Lighten & Firm Eye Serum.

All products in the line are free of parabens, dyes, and fragrances.
