The Ultimate Replere®

Deciding what at home skin care system to use can be overwhelming. Not only are there millions of options (*literally*) but trusting what they claim to achieve is often blurred by big words and false promises. This however is not the case when you look into an at home regime that is created by one of the country's leading Board-Certified Dermatologists, Dr. Debbie Palmer, and this is when all doubt subsides. Dr. Palmer is the Medical Director at a very busy, private practice, Dermatology Associates of New York, in Harrison, New York. She specializes in medical dermatology, cosmetic dermatology, and laser surgery. She is the founder and creator of Replere®, a natural, antioxidant-based skincare line. Replere® skincare line is an exclusive blend of antioxidants that neutralize age-accelerating free radicals...aka damage to the skin created from too much sun exposure, polluted air from second hand smoke and car exhaust, emotional and physical stress, poor diet and even fitness. All of these factors contribute heavily to the speed at which skin ages. Replere® is a combination of antioxidants as well as other anti-aging ingredients such as exfoliating glycolic, salicylic, azelaic acids, and hydrating hyaluronic acid to heal the damage that has been done. "I developed Replere® as a collection of repair products for your skin," says Dr. Debbie Palmer. "They are designed to be applied to the skin first, under your moisturizer, and in weeks, they will make a visible difference in the over appearance of your skin." Whether or not you fully understand the full meaning of each ingredient or acid above Dr. Palmer patiently explains all inquiries for each patient to ensure clarity. And after trying the

Replere® system myself I found that a visible difference was absolutely achieved within ten days of using it routinely. After experiencing Replere® at home skin care I realized that the best way to go about figuring out which at home skin care system to purchase is to go through your dermatologist or skin care specialist. Not only does their credibility back them but they are much more familiar with your skin condition and history than anyone else. And, as Dr. Palmer says, "If you do not fight the most potent form of aging - free radicals - with antioxidants, you will be missing out on your fully beauty potential." Check out the Replere® skin care line on www.replere.com and book your appointment with Dr. Palmer asap! Stay tuned for further info on all that Dr. Palmer and her wonderful practice offer for every GG out there.

"Dr. Debbie Palmer is a Board-Certified Dermatologist and one of the country's leading experts in the field of antioxidants—and how they can improve the health and appearance of the skin. Widely respected for her expertise, Dr. Palmer has had her work published in leading medical journals and regularly gives lectures nationally and internationally about the benefits of antioxidants. She also frequently gives lectures and skin cancer screenings for many community-based programs, as well as for major corporations. Dr. Palmer is also the co-author of *The Dermatologists' Prescription for a New You!* Dr. Palmer currently resides in Greenwich, Connecticut with her husband and two young children. She is a fellow and active member of the American Academy of Dermatology, American Osteopathic College of Dermatology, and the American Osteopathic Association. Dr. Palmer is a leading proponent of the standardization of antioxidants in skincare through a measurement system called ORAC—or Oxygen Radical Absorbance Capacity. Typically used when discussing the antioxidant levels in food, ORAC had not been routinely applied as a measurement of the antioxidant levels in skincare products before Dr. Palmer."
